DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10, 12, 13, 16-19 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Yano et al (5,985,404, cited by applicant).

Yano et al disclose a dielectric recording apparatus which including medium with dielectric material, a probe (1) for recording data in the dielectric material, a record data voltage generation device, a bias voltage generation device, a voltage application device for combining the voltage corresponding to the data and the bias voltage and applying the combined voltage to the probe (Fig. 1)

With respect to coercive electric field recited in claim 2, 7, 16, see Col 8, lines 15-41.

With respect to reversing polarity recited in claims 4, 9, and 18, see col 8, lines 15-41.

With respect to ferroelectric material recited in claims 5, 12, 18 and 21, see abstract or col. 8, lines 5-41.

Allowable Subject Matter

Claims 11, 14, 15, and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
